Project Overview

Tell us a little about your project. What are the main objectives of the project, and who will benefit from it?

The objective is to drill a water well in a rural area of Kenya near the town of Machakos where the local people have come together and raised funds to build a high school. Due to the high drop out rate of the high-school-aged children in the area, the families took on the job of building the school from donations. It has been recognized by the Kenyan government as a registered high school. The locals would like to make it into a boarding school because of the distance the students need to walk to get to school, and due to the danger of walking in the early mornings and late afternoons, especially for the female students. Walking long distances is necessary because the school does not have its own water source.

Areas of Focus

Project planning

Describe the community needs that your project will address.

There are no water wells within this area that can supply the high school or homesteads. All rely on rain catchment or water is delivered to the school.

How did your project team identify these needs?

How were members of the benefiting community involved in finding solutions?

How were community members involved in planning the project?

The local parents came together and raised the money to build the high school, which consists of two large rooms. They obtained the land, which was public land in the past as a cattle dip area, and had it transferred over to the Kyaani Secondary School. They came to Friends of Woni Kenya International, Inc. to help build a girls dorm, since the female students are most at risk while walking long distances from their homes in the early mornings and late afternoons. After the girls dorm is built, the plan is to start raising funds for a boys dorm, again because of the large distances that they have to walk from their homesteads. Most inhabitants of this area do not have transportation such as cars, and the roads are not conducive to riding a bike.

Project implementation

| # | Activity | Duration |
|---|--|------------------------------------|
| 1 | Obtain drilling permit | 10 days |
| 2 | Drill well | 4 days (depends on depth required) |
| 3 | Install solar pump & all necessary fixtures | 30 days |
| 4 | Install solar panels | 30 days |
| 5 | Train local residents to operate & maintain water system | 15 days |

Will you work in coordination with any related initiatives in the community?

Please describe the training, community outreach, or educational programs this project will include.

How were these needs identified?

What incentives (for example, monetary compensation, awards, certification, or publicity), will you use, if any, to encourage community members to participate in the project?

List any community members or community groups that will oversee the continuation of the project after grant-funded activities conclude.

Budget

Will you purchase budget items from local vendors?

Did you use competitive bidding to select vendors?

Please provide an operations and maintenance plan for the equipment or materials you anticipate purchasing for this project. This plan should include who will operate and maintain the equipment and how they will be trained.

Describe how community members will maintain the equipment after grant-funded activities conclude. Will replacement parts be available?

The local people, under the direction of the Kyaani High School Board are responsible for maintaining the water well and solar pumping and distribution system for the benefit of the school and the surrounding community. The local vendors will be available to provide any necessary parts.

If the grant will be used to purchase any equipment, will the equipment be culturally appropriate and conform to the community's technology standards?

After the project is completed, who will own the items purchased by grant funds? No items may be owned by a Rotary district, club, or member.

Kyaani High School Board

Funding

Have you found a local funding source to sustain project outcomes for the long term?

Will any part of the project generate income for ongoing project funding? If yes, please explain.

Clean water and sanitation is a human right. When people, especially children, have access to clean water, sanitation, and hygiene, they lead healthier and more successful lives.

We don't just build wells and walk away. Rotary members integrate water, sanitation, and hygiene into education projects. When children learn about disease transmission and practice good hygiene, they miss less school. And they can take those lessons home to their families, expanding our impact.

HOW ROTARY MAKES HELP HAPPEN
